

include/jevois/Core  
/IMUdata.H

```
graph TD; A[include/jevois/Core/IMUdata.H] --> B[vector]; A --> C[string];
```

The diagram illustrates a C++ header file's dependencies. A central box at the top contains the text 'include/jevois/Core/IMUdata.H'. Two blue arrows originate from the bottom of this box and point downwards to two separate boxes. The left box contains the word 'vector' and the right box contains the word 'string'. This represents the header file including the standard library headers for these data types.
